Tax Technical Corrections Bill: The technical corrections bill to remedy problems in the Tax Reform Act of 1986 has stalled in the Senate. The act contains a provision which requires reporting of certain contract information, an issue which would require the Agency to report sensitive and classified information. There is a provision in the technical corrections bill which would exempt certain classified or sensitive contracts from the reporting requirements. It is possible that the measure may yet be enacted before the Congress adjourns. If not, the bill will be taken up in January at the start of the next session.

25X1

N.Y. Housing Allowance: The House Intelligence Committee staff proposed earlier in the week that the Agency employees living in N.Y. City increase their contribution for housing from 5% of their salary to 20% of their salary. In exchange, the House Intelligence Committee would go along with the Agency reimbursing employees for any tax owed on the housing allowance provided to the employee. The IRS had recently ruled that such allowances are taxable. This proposal parallels legislative relief that has been granted to State Department employees living in N.Y. City. We informed the House Intelligence Committee staff that their proposal to raise employee contribution for housing to 20% of salary was unacceptable because it would make it very difficult to recruit high caliber officers willing to serve in the N.Y. City area. The Committee staff emphasized that benefits to Agency employees should not get too far ahead of the compensation package provided to State or FBI employees serving in N.Y. City. The staff seemed willing to explore alternative compensation packages for our employees that would provide relief from the IRS ruling.

25X1

Task Force on Counterintelligence and Security: The Senate Intelligence Committee has established a task force composed of eight staffers to look into progress and problems in the areas of counterintelligence and security. The task force has asked for briefings from the Agency and other members of the intelligence community on embassy security, the New Office Building in Moscow and personnel security. The task force intends to publish a series of internal memoranda with recommendations for Committee Members on the results of their research. The staff has expressed a particular interest in the implementation of the Security Evaluation Office.

is scheduled to brief them on 6 October 1988.
